

1 Tests

1.1 Test ID : 3 - Verify user can install WhatsApp to an IOS device

Field Label	Field Value	Field Label	Field Value
Test Name	Verify user can install WhatsApp to an IOS device	Type	MANUAL
Designer	alm12()	Creation Date	9/6/16
Execution Status	Passed	Subject	Installation for IOS

Description

1.1.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch the App store from IOS device	App store should be launched from IOS device
Step 2	click on search button and type whatsapp to search box and click on search	whatsapp application should be listed on the page
Step 3	click on get button	whatsapp installation should be started and finished
Step 4	click on open button	whatsapp application should open and Agree&Continue page should be viewed
Step 5	click on agree&continue	your phone number page should open and Notification "Allow/Dont Allow" window should come up
Step 6	click on allow or dont allow, enter the phone number for valid whatsapp user account then click on done button	restore chat history page should open
Step 7	click on restore chat history	chat history should be restored
Step 8	click on next	edit profile page should open
Step 9	enter user name, edit user photograph then click on done	user name and photograph should be uploaded and chat page should be viewed restored chat history

1.2 Test ID : 4 - verify user can view settings module

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can view settings module	Type	MANUAL
Designer	alm12()	Creation Date	9/6/16
Execution Status	Passed	Subject	Settings

Description

1.2.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	click on setting icon	settings module should be viewed

1.3 Test ID : 5 - verify user can update photograph,name and about

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can update photograph,name and about	Type	MANUAL
Designer	alm12()	Creation Date	9/6/16
Execution Status	Passed	Subject	Settings

Description

1.3.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	click on setting icon	settings module should be viewed
Step 3	tap on photograph,name,about box	edit profile page should open
Step 4	tap on edit under the photograph	profile photo page should open
Step 5	tap on edit on the right upper corner of the screen	delete photo, take photo, choose photo or cancel options should be viewed
Step 6	select on desired photo update option take photo or choose photo	for take photo, camera should open after allowing whatsapp to access the camera for choose photo, photo albums should open after allowing whatsapp to access photos
Step 7	take a photo from camera and tap on use photo or choose a photo from albums	photo should be updated
Step 8	tap on the name	editing name should be enabled
Step 9	type the name and tap on done button	name should be updated
Step 10	tap on about box	about page should open
Step 11	select one of the listed about descriptions or tap on "currently set to" to customize the about status	about status should be updated

1.4 Test ID : 6 - verify user can delete from the about status list

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can delete from the about status list	Type	MANUAL
Designer	alm12()	Creation Date	9/7/16
Execution Status	Passed	Subject	Settings

Description

1.4.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	click on setting icon	settings module should be viewed
Step 3	tap on photograph,name,about box	edit profile page should open
Step 4	tap on about box	about page should open
Step 5	tap on edit	editing should be enabled
Step 6	tap on the icon with minus in red circle and tap on delete then tap on done	selected about status should be deleted
Step 7	tap on edit	editing should be enabled
Step 8	tap on about status to customize it, edit it and tap on save	about status should be customized

1.5 Test ID : 7 - verify user can viewed starred messages or media files

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can viewed starred messages or media files	Type	MANUAL
Designer	alm12()	Creation Date	9/7/16
Execution Status	Passed	Subject	Settings

Description

1.5.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on setting icon	settings module should be viewed

Step 3	tap on starred messages	starred messages and media files should be viewed
--------	-------------------------	---

1.6 Test ID : 8 - verify user can view whatsapp web QR scan page

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can view whatsapp web QR scan page	Type	MANUAL
Designer	alm12()	Creation Date	9/7/16
Execution Status	Passed	Subject	Settings

Description

1.6.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on setting icon	settings module should be viewed
Step 3	tap on WhatsApp Web/Desktop	scan QR code page should be viewed

1.7 Test ID : 9 - verify user can log in to whatsapp web

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can log in to whatsapp web	Type	MANUAL
Designer	alm12()	Creation Date	9/7/16
Execution Status	Passed	Subject	Settings

Description

1.7.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on setting icon	settings module should be viewed
Step 3	tap on WhatsApp Web/Desktop	scan QR code page should be viewed
Step 4	scan the QR code from web page	whatsApp Web should be logged in

1.8 Test ID : 10 - verify user can view account settings page

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can view account settings page	Type	MANUAL
Designer	alm12()	Creation Date	9/7/16
Execution Status	Passed	Subject	Settings

Description

1.8.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on setting icon	settings module should be viewed
Step 3	tap on account	account settings page should be viewed

1.9 Test ID : 11 - verify user can view privacy settings page

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can view privacy settings page	Type	MANUAL
Designer	alm12()	Creation Date	9/7/16
Execution Status	Passed	Subject	Settings

Description

1.9.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on setting icon	settings module should be viewed
Step 3	tap on account	account settings page should be viewed
Step 4	tap on privacy	privacy settings page should be viewed

1.10 Test ID : 12 - verify user can select Last Seen availability

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can select Last Seen availability	Type	MANUAL

Designer	alm12()	Creation Date	9/7/16
Execution Status	Passed	Subject	Settings

Description

1.10.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on setting icon	settings module should be viewed
Step 3	tap on account	account settings page should be viewed
Step 4	tap on privacy	privacy settings page should be viewed
Step 5	tap on last seen	available groups should be listed (Everyone, My Contacts, Nobody)
Step 6	select the last seen group to be available	last seen availability should be updated

1.11 Test ID : 13 - verify user can select Profile Photo availability

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can select Profile Photo availability	Type	MANUAL
Designer	alm12()	Creation Date	9/7/16
Execution Status	Passed	Subject	Settings

Description

1.11.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on setting icon	settings module should be viewed
Step 3	tap on account	account settings page should be viewed
Step 4	tap on privacy	privacy settings page should be viewed
Step 5	tap on Profile Photo	available groups should be listed (Everyone, My Contacts, Nobody)
Step 6	select the Profile Photo group to be available	Profile Photo availability should be updated

1.12 Test ID : 14 - verify user can select About availability

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can select About availability	Type	MANUAL
Designer	alm12()	Creation Date	9/7/16
Execution Status	Passed	Subject	Settings

Description

1.12.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on setting icon	settings module should be viewed
Step 3	tap on account	account settings page should be viewed
Step 4	tap on privacy	privacy settings page should be viewed
Step 5	tap on About	available groups should be listed (Everyone, My Contacts, Nobody)
Step 6	select the About group to be available	About availability should be updated

1.13 Test ID : 15 - verify user can select Status availability

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can select Status availability	Type	MANUAL
Designer	alm12()	Creation Date	9/7/16
Execution Status	Passed	Subject	Settings

Description

1.13.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on setting icon	settings module should be viewed
Step 3	tap on account	account settings page should be viewed
Step 4	tap on privacy	privacy settings page should be viewed

Step 5	tap on Status	available groups should be listed (My Contacts,My Contacts Except, Only Share with)
Step 6	select the Status group to be available and select the people for Only or Except options	Status availability should be updated

1.14 Test ID : 16 - verify user can select or delete people for Satatus availability options (My contacts except, Only share with)

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can select or delete people for Satatus availability options (My contacts except, Only share with)	Type	MANUAL
Designer	alm12()	Creation Date	9/7/16
Execution Status	Passed	Subject	Settings

Description

1.14.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on setting icon	settings module should be viewed
Step 3	tap on account	account settings page should be viewed
Step 4	tap on privacy	privacy settings page should be viewed
Step 5	tap on Status	available groups should be listed (My Contacts,My Contacts Except, Only Share with)
Step 6	tap on my contacts except	contact list page should open
Step 7	select the contacts to be excluded	contacts should be selected
Step 8	click on done	Status availability should be updated for my contacts by excluding selected contacts
Step 9	tap on Only Share with	contact list page should open
Step 10	select the only contacts to share the status with	contacts should be selected
Step 11	click on done	Status availability should be updated for only shared contacts

1.15 Test ID : 17 - verify user can view shared live location list and stop sharing location

Field Label	Field Value	Field Label	Field Value
-------------	-------------	-------------	-------------

Test Name	verify user can view shared live location list and stop sharing location	Type	MANUAL
Designer	alm12()	Creation Date	9/7/16
Execution Status	Passed	Subject	Settings

Description

1.15.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on setting icon	settings module should be viewed
Step 3	tap on account	account settings page should be viewed
Step 4	tap on privacy	privacy settings page should be viewed
Step 5	tap on Live Location	Live Location chat list page should open
Step 6	tap on stop sharing	stop sharing confirmation or cancel option should be viewed
Step 7	tap on stop sharing to confirm	Live location sharing should be stopped

1.16 Test ID : 18 - verify user can view blocked contacts, add new contact to be blocked or remove block

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can view blocked contacts, add new contact to be blocked or remove block	Type	MANUAL
Designer	alm12()	Creation Date	9/7/16
Execution Status	Passed	Subject	Settings

Description

1.16.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on setting icon	settings module should be viewed
Step 3	tap on account	account settings page should be viewed
Step 4	tap on privacy	privacy settings page should be viewed

Step 5	tap on blocked	Blocked page and blocked contacts should be viewed
Step 6	tap on edit and tap on the minus icon in red circle to remove the block from a contact	unlock button should be viewed
Step 7	tap on unblock	block should be removed from that contact
Step 8	tap on done	editing should be completed
Step 9	tap on add new	contact list should be viewed
Step 10	select the contacts to be blocked	contact should be added to blocked list

1.17 Test ID : 19 - verify user can turn on and off Read Reciepts

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can turn on and off Read Reciepts	Type	MANUAL
Designer	alm12()	Creation Date	9/7/16
Execution Status	Passed	Subject	Settings

Description

1.17.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on setting icon	settings module should be viewed
Step 3	tap on account	account settings page should be viewed
Step 4	tap on privacy	privacy settings page should be viewed
Step 5	slide the on/off button left and right	read reciepts should be turned off then turned on

1.18 Test ID : 20 - verify user can set a screen lock

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can set a screen lock	Type	MANUAL
Designer	alm12()	Creation Date	9/7/16
Execution Status	Passed	Subject	Settings

Description

1.18.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on setting icon	settings module should be viewed
Step 3	tap on account	account settings page should be viewed
Step 4	tap on privacy	privacy settings page should be viewed
Step 5	tap on screen lock	face ID page should open
Step 6	slide the Require Face ID button to right to set the screen lock	face ID should be set

1.19 Test ID : 21 - verify user can turn on Show Security Notifications

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can turn on Show Security Notifications	Type	MANUAL
Designer	alm12()	Creation Date	9/7/16
Execution Status	Passed	Subject	Settings

Description

1.19.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on setting icon	settings module should be viewed
Step 3	tap on account	account settings page should be viewed
Step 4	tap on security	security page should be viewed
Step 5	slide the button to right to turn on Show Security Notifications	Show Security Notifications should be turned on

1.20 Test ID : 22 - verify user can enable Two-Step Verification

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can enable Two-Step Verification	Type	MANUAL
Designer	alm12()	Creation Date	9/7/16
Execution Status	Passed	Subject	Settings

Description

1.20.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on setting icon	settings module should be viewed
Step 3	tap on account	account settings page should be viewed
Step 4	tap on Two-Step Verification	Two-Step Verification page should be viewed
Step 5	tap on enable	six-digit password should be asked
Step 6	enter a six digit password	six digit password should be entered
Step 7	confirm the six digit password by re-entering	six digit password should be entered
Step 8	enter user's email address	email address should be entered
Step 9	tap on next	email confirmation page should be viewed
Step 10	re-enter email address to confirm	email address should be re-entered
Step 11	tap on done	two step verification should be enabled

1.21 Test ID : 23 - verify user can change the Pin for Two-Step Verification

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can change the Pin for Two-Step Verification	Type	MANUAL
Designer	alm12()	Creation Date	9/7/16
Execution Status	Passed	Subject	Settings

Description

1.21.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on setting icon	settings module should be viewed
Step 3	tap on account	account settings page should be viewed
Step 4	tap on Two-Step Verification	Two-Step Verification page should be viewed

Step 5	tap on change PIN	new six-digit password should be asked
Step 6	enter new six digit PIN	confirm PIN page should be viewed
Step 7	re-enter the six digit PIN to confirm	PIN should be changed

1.22 Test ID : 24 - verify user can change the email address for Two-Step Verification

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can change the email address for Two-Step Verification	Type	MANUAL
Designer	alm12()	Creation Date	9/7/16
Execution Status	Passed	Subject	Settings

Description

1.22.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on setting icon	settings module should be viewed
Step 3	tap on account	account settings page should be viewed
Step 4	tap on Two-Step Verification	Two-Step Verification page should be viewed
Step 5	tap on change email address	an email address should be asked
Step 6	enter new email address	confirm email address page should be viewed
Step 7	re-enter the email address to confirm	email address should be changed

1.23 Test ID : 25 - verify user can disable Two-Step Verification

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can disable Two-Step Verification	Type	MANUAL
Designer	alm12()	Creation Date	9/7/16
Execution Status	Passed	Subject	Settings

Description

1.23.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on setting icon	settings module should be viewed
Step 3	tap on account	account settings page should be viewed
Step 4	tap on Two-Step Verification	Two-Step Verification page should be viewed
Step 5	tap on disable	disable confirmation notice should appear
Step 6	tap on disable	Two-Step Verification should be disabled

1.24 Test ID : 26 - verify user can change phone number for the whatsapp account

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can change phone number for the whatsapp account	Type	MANUAL
Designer	alm12()	Creation Date	9/7/16
Execution Status	Passed	Subject	Settings

Description

1.24.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on setting icon	settings module should be viewed
Step 3	tap on account	account settings page should be viewed
Step 4	tap on change number	change number page should be viewed
Step 5	tap on next	Old phone number and new phone number page should be viewed
Step 6	enter old phone number and new phone number	numbers should be entered
Step 7	click on next	phone number should be updated (ill end the test here since i dont have a new number to change)

1.25 Test ID : 27 - verify user can request account info

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can request account	Type	MANUAL

	info		
Designer	alm12()	Creation Date	9/7/16
Execution Status	Passed	Subject	Settings

Description

1.25.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on setting icon	settings module should be viewed
Step 3	tap on account	account settings page should be viewed
Step 4	tap on request account info	request account info page should be viewed
Step 5	tap on request report	request should be sent

1.26 Test ID : 28 - verify user can delete the account

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can delete the account	Type	MANUAL
Designer	alm12()	Creation Date	9/7/16
Execution Status	Passed	Subject	Settings

Description

1.26.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on setting icon	settings module should be viewed
Step 3	tap on account	account settings page should be viewed
Step 4	tap on delete my account	delete my account page should be viewed
Step 5	enter account phone number and tap on delete my account	account should be deleted

1.27 Test ID : 29 - verify user can view chats settings

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can view chats settings	Type	MANUAL
Designer	alm12()	Creation Date	9/7/16
Execution Status	Passed	Subject	Settings

Description

1.27.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on setting icon	settings module should be viewed
Step 3	tap on chats	chats page should be viewed

1.28 Test ID : 30 - verify user can set a chat wallpaper from wallpaper library

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can set a chat wallpaper from wallpaper library	Type	MANUAL
Designer	alm12()	Creation Date	9/7/16
Execution Status	Passed	Subject	Settings

Description

1.28.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on setting icon	settings module should be viewed
Step 3	tap on chats	chats page should be viewed
Step 4	tap on chat wallpaper	chat wallpaper page should be viewed
Step 5	tap on wallpaper library	wallpaper library should open
Step 6	select the wallpaper	wallpaper preview should be viewed
Step 7	tap on still or perspective	still or perspective should be selected
Step 8	tap on set	wallpaper should be set

1.29 Test ID : 31 - verify user can set a chat wallpaper from solid colors library

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can set a chat wallpaper from solid colors library	Type	MANUAL
Designer	alm12()	Creation Date	9/7/16
Execution Status	Passed	Subject	Settings

Description

1.29.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on setting icon	settings module should be viewed
Step 3	tap on chats	chats page should be viewed
Step 4	tap on chat wallpaper	chat wallpaper page should be viewed
Step 5	tap on solid colors	solid colors library should be viewed
Step 6	select the wallpaper	wallpaper preview should be viewed
Step 7	tap on set	wallpaper should be set

1.30 Test ID : 32 - verify user can set a chat wallpaper from photos in the device

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can set a chat wallpaper from photos in the device	Type	MANUAL
Designer	alm12()	Creation Date	9/7/16
Execution Status	Passed	Subject	Settings

Description

1.30.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open

Step 2	tap on setting icon	settings module should be viewed
Step 3	tap on chats	chats page should be viewed
Step 4	tap on chat wallpaper	chat wallpaper page should be viewed
Step 5	tap on photos	photo albums should be viewed
Step 6	select the photo for wallpaper	wallpaper preview should be viewed
Step 7	tap on still or perspective	still or perspective should be selected
Step 8	tap on set	wallpaper should be set

1.31 Test ID : 33 - verify user can reset the wallpaper

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can reset the wallpaper	Type	MANUAL
Designer	alm12()	Creation Date	9/7/16
Execution Status	Passed	Subject	Settings

Description

1.31.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on setting icon	settings module should be viewed
Step 3	tap on chats	chats page should be viewed
Step 4	tap on chat wallpaper	chat wallpaper page should be viewed
Step 5	tap on reset wallpaper	reset walpaper confirmation should be asked
Step 6	tap on reset wallpaper	wallpaper should be reset

1.32 Test ID : 34 - verify user can turn on and off automatic saving for the photos and videos recieved

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can turn on and off automatic saving for the photos and videos recieved	Type	MANUAL
Designer	alm12()	Creation Date	9/7/16

Execution Status	Passed	Subject	Settings
------------------	--------	---------	----------

Description

1.32.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on setting icon	settings module should be viewed
Step 3	tap on chats	chats page should be viewed
Step 4	slide save to camera roll button left to turn off then right to turn on	save to camera roll should be turned on and off

1.33 Test ID : 35 - verify user can view chat backup page

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can view chat backup page	Type	MANUAL
Designer	alm12()	Creation Date	9/7/16
Execution Status	Passed	Subject	Settings

Description

1.33.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on setting icon	settings module should be viewed
Step 3	tap on chats	chats page should be viewed
Step 4	tap on chat backup	chat backup page should be viewed

1.34 Test ID : 36 - verify user can backup the chats anytime

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can backup the chats anytime	Type	MANUAL
Designer	alm12()	Creation Date	9/7/16
Execution Status	Passed	Subject	Settings

Description

1.34.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on setting icon	settings module should be viewed
Step 3	tap on chats	chats page should be viewed
Step 4	tap on chat backup	chat backup page should be viewed
Step 5	tap on back up now	back up should be started and completed

1.35 Test ID : 37 - verify user can set auto backup

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can set auto backup	Type	MANUAL
Designer	alm12()	Creation Date	9/7/16
Execution Status	Passed	Subject	Settings

Description

1.35.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on setting icon	settings module should be viewed
Step 3	tap on chats	chats page should be viewed
Step 4	tap on chat backup	chat backup page should be viewed
Step 5	tap on auto backup	auto backup time periods should listed
Step 6	select the auto backup period	auto backup should be set

1.36 Test ID : 38 - verify user can include videos during backups

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can include videos during backups	Type	MANUAL
Designer	alm12()	Creation Date	9/7/16

Execution Status	Passed	Subject	Settings
------------------	--------	---------	----------

Description

1.36.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on setting icon	settings module should be viewed
Step 3	tap on chats	chats page should be viewed
Step 4	tap on chat backup	chat backup page should be viewed
Step 5	slide include videos button right	set up should be complete for backups to include videos

1.37 Test ID : 39 - verify user can archive, clear or delete all chats

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can archive, clear or delete all chats	Type	MANUAL
Designer	alm12()	Creation Date	9/7/16
Execution Status	Passed	Subject	Settings

Description

1.37.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on setting icon	settings module should be viewed
Step 3	tap on chats	chats page should be viewed
Step 4	tap on archive all chats, clear all chats or delete all chats	archiving, clearing and deleting should be completed

1.38 Test ID : 40 - verify user can view notifications settings

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can view notifications settings	Type	MANUAL
Designer	alm12()	Creation Date	9/7/16
Execution Status	Passed	Subject	Settings

Description

1.38.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on setting icon	settings module should be viewed
Step 3	tap on notifications	notifications page should be viewed

1.39 Test ID : 41 - verify user can set message notifications

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can set message notifications	Type	MANUAL
Designer	alm12()	Creation Date	9/7/16
Execution Status	Passed	Subject	Settings

Description

1.39.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on setting icon	settings module should be viewed
Step 3	tap on notifications	notifications page should be viewed
Step 4	slide show notifications button to turn on and off	show notifications should be turned on and off
Step 5	tap on sound under message notifications	sound list should be viewed
Step 6	select the sound	sound should be selected and preview should be heard
Step 7	tap on save	sound should be set

1.40 Test ID : 42 - verify user can set group notifications

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can set group notifications	Type	MANUAL
Designer	alm12()	Creation Date	9/7/16

Execution Status	Passed	Subject	Settings
Description			

1.40.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on setting icon	settings module should be viewed
Step 3	tap on notifications	notifications page should be viewed
Step 4	slide show notifications button to turn on and off under group notifications	show notifications should be turned on and off
Step 5	tap on sound under group notifications	sound list should be viewed
Step 6	select the sound	sound should be selected and preview should be heard
Step 7	tap on save	sound should be set

1.41 Test ID : 43 - verify user can edit In-App notifications

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can edit In-App notifications	Type	MANUAL
Designer	alm12()	Creation Date	9/7/16
Execution Status	Passed	Subject	Settings

Description

1.41.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on setting icon	settings module should be viewed
Step 3	tap on notifications	notifications page should be viewed
Step 4	tap on In-app notifications	in-app notifications page should be viewed
Step 5	tap on the alert style	alert style should be set
Step 6	slide the sounds button to turn on and off	sounds should be turned on and off

Step 7	slide the vibrate button to turn on and off	vibration should be turned on and off
--------	---	---------------------------------------

1.42 Test ID : 44 - verify user can turn on and off show preview notification

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can turn on and off show preview notification	Type	MANUAL
Designer	alm12()	Creation Date	9/7/16
Execution Status	Passed	Subject	Settings

Description

1.42.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on setting icon	settings module should be viewed
Step 3	tap on notifications	notifications page should be viewed
Step 4	slide show preview button left and right to turn on and off	show preview notification should be turned on and off

1.43 Test ID : 45 - verify user can reset notification settings

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can reset notification settings	Type	MANUAL
Designer	alm12()	Creation Date	9/7/16
Execution Status	Passed	Subject	Settings

Description

1.43.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on setting icon	settings module should be viewed
Step 3	tap on notifications	notifications page should be viewed
Step 4	tap on reset notification settings	reset confirmation should be asked

Step 5

tap on reset to confirm

notification settings should be reset

1.44 Test ID : 46 - verify user can view data and storage usage page

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can view data and storage usage page	Type	MANUAL
Designer	alm12()	Creation Date	9/7/16
Execution Status	Passed	Subject	Settings

Description

1.44.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on setting icon	settings module should be viewed
Step 3	tap on data and storage usage	data and storage usage page should be viewed

1.45 Test ID : 47 - verify user can set media auto-download settings

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can set media auto-download settings	Type	MANUAL
Designer	alm12()	Creation Date	12/27/19
Execution Status	Passed	Subject	Settings

Description

photos
audio
videos
documents

1.45.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on setting icon	settings module should be viewed
Step 3	tap on data and storage usage	data and storage usage page should be viewed
Step 4	tap on photos	media auto download options should be listed (never, Wi-Fi, Wi-Fi and Cellular)

Step 5	select the auto-download option	auto-download option should be selected
Step 6	tap on back	auto-download option should be set. data usage and storage usage page should be viewed
Step 7	tap on audio	media auto download options should be listed (never, Wi-Fi, Wi-Fi and Cellular)
Step 8	select the auto-download option	auto-download option should be selected
Step 9	tap on back	auto-download option should be set. data usage and storage usage page should be viewed
Step 10	tap on videos	media auto download options should be listed (never, Wi-Fi, Wi-Fi and Cellular)
Step 11	select the auto-download option	auto-download option should be selected
Step 12	tap on back	auto-download option should be set. data usage and storage usage page should be viewed
Step 13	tap on documents	media auto download options should be listed (never, Wi-Fi, Wi-Fi and Cellular)
Step 14	select the auto-download option	auto-download option should be selected
Step 15	tap on back	auto-download option should be set. data usage and storage usage page should be viewed

1.46 Test ID : 48 - verify user can reset auto-download settings

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can reset auto-download settings	Type	MANUAL
Designer	alm12()	Creation Date	12/27/19
Execution Status	Passed	Subject	Settings

Description

1.46.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on setting icon	settings module should be viewed
Step 3	tap on data and storage usage	data and storage usage page should be viewed
Step 4	tap on reset auto-download settings	auto-download settings should be reset

1.47 Test ID : 49 - verify user can turn on and off low data usage during the whatsapp calls

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can turn on and off low data usage during the whatsapp calls	Type	MANUAL
Designer	alm12()	Creation Date	12/27/19
Execution Status	Passed	Subject	Settings

Description

1.47.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on setting icon	settings module should be viewed
Step 3	tap on data and storage usage	data and storage usage page should be viewed
Step 4	slide low data usage button right and left to turn it on and off	low data usage should be turned on and off

1.48 Test ID : 50 - verify user can view network usage page and reset statistics

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can view network usage page and reset statistics	Type	MANUAL
Designer	alm12()	Creation Date	12/27/19
Execution Status	Passed	Subject	Settings

Description

1.48.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on setting icon	settings module should be viewed
Step 3	tap on data and storage usage	data and storage usage page should be viewed

Step 4	tap on network usage	network usage page should be viewed
Step 5	scroll down and tap on reset statistics	reset statistics confirmation should be asked
Step 6	tap on reset statistics	network usage statistics should be reset

1.49 Test ID : 51 - verify user can view storage usage details

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can view storage usage details	Type	MANUAL
Designer	alm12()	Creation Date	12/27/19
Execution Status	Passed	Subject	Settings

Description

1.49.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on setting icon	settings module should be viewed
Step 3	tap on data and storage usage	data and storage usage page should be viewed
Step 4	tap on storage usage	storage usage page should be viewed

1.50 Test ID : 52 - verify user can manage storage usage

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can manage storage usage	Type	MANUAL
Designer	alm12()	Creation Date	12/27/19
Execution Status	Passed	Subject	Settings

Description

1.50.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on setting icon	settings module should be viewed
Step 3	tap on data and storage usage	data and storage usage page should be viewed

Step 4	tap on storage usage	storage usage page should be viewed
Step 5	select the chat to manage the storage usage	chat storage usage detail page should be viewed
Step 6	tap on manage	storage usage details enabled for selecting
Step 7	select the storage usage type to delete	storage usage types should be selected
Step 8	tap on clear	clear confirmation should be asked
Step 9	tap on clear	storage usage should be cleared

1.51 Test ID : 53 - verify user can view help page

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can view help page	Type	MANUAL
Designer	alm12()	Creation Date	12/27/19
Execution Status	Passed	Subject	Settings

Description

1.51.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on setting icon	settings module should be viewed
Step 3	tap on help	help page should be viewed

1.52 Test ID : 54 - verify user can view FAQ page

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can view FAQ page	Type	MANUAL
Designer	alm12()	Creation Date	12/27/19
Execution Status	Passed	Subject	Settings

Description

1.52.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open

Step 2	tap on setting icon	settings module should be viewed
Step 3	tap on help	help page should be viewed
Step 4	tap on FAQ	FAQ page should be viewed

1.53 Test ID : 55 - verify user can use contact us module to report a problem

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can use contact us module to report a problem	Type	MANUAL
Designer	alm12()	Creation Date	12/27/19
Execution Status	Passed	Subject	Settings

Description

1.53.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on setting icon	settings module should be viewed
Step 3	tap on help	help page should be viewed
Step 4	tap on contact us	contact us page should be viewed
Step 5	tap in the Please Describe Your problem box and type your problem with at least ten characters	problem description should be typed
Step 6	tap on plus sign to add a photo or screenshot	camera roll should open
Step 7	select the photo	photo should be added
Step 8	tap on next	email should be created for support department
Step 9	tap on sent button	email should be sent

1.54 Test ID : 56 - verify user can view terms and privacy policy

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can view terms and privacy policy	Type	MANUAL
Designer	alm12()	Creation Date	12/27/19
Execution Status	Passed	Subject	Settings

Description

1.54.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on setting icon	settings module should be viewed
Step 3	tap on help	help page should be viewed
Step 4	tap on terms and privacy policy	terms and privacy policyweb page should be viewed

1.55 Test ID : 57 - verify user can view licenses

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can view licenses	Type	MANUAL
Designer	alm12()	Creation Date	12/27/19
Execution Status	Passed	Subject	Settings

Description

1.55.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on setting icon	settings module should be viewed
Step 3	tap on help	help page should be viewed
Step 4	tap on licenses	licenses page should be viewed

1.56 Test ID : 58 - verify user can tell a friend about whatsapp

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can tell a friend about whatsapp	Type	MANUAL
Designer	alm12()	Creation Date	12/27/19
Execution Status	Passed	Subject	Settings

Description

1.56.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on setting icon	settings module should be viewed
Step 3	tap on tell a friend	notification options should be listed (mail, message, more)
Step 4	select the notification method and verify notification is sent	notification should be sent

1.57 Test ID : 59 - verify user can view chats

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can view chats	Type	MANUAL
Designer	alm12()	Creation Date	12/27/19
Execution Status	Passed	Subject	Chats

Description

1.57.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on chats	chats should be viewed

1.58 Test ID : 60 - verify user can send a message to an individual or group

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can send a message to an individual or group	Type	MANUAL
Designer	alm12()	Creation Date	12/27/19
Execution Status	Passed	Subject	Chats

Description

1.58.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on chats	chats should be viewed
Step 3	tap on create a message icon	contact list should be viewed

Step 4	select the individual or group for message to be sent	chat page with that individual or group should be viewed with the chat history
Step 5	tap on text box	keybord should open
Step 6	type the message	message should be type
Step 7	tap on send button	message should be sent

1.59 Test ID : 61 - verify user can search an individual or group to send message

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can search an individual or group to send message	Type	MANUAL
Designer	alm12()	Creation Date	12/27/19
Execution Status	Passed	Subject	Chats

Description

1.59.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on chats	chats should be viewed
Step 3	tap on create a message icon	contact list should be viewed
Step 4	tap on search box	keybord should be enabled
Step 5	type the name to be searched	name should be type and matching contacts should be viewed

1.60 Test ID : 62 - verify user can create a new chat group

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can create a new chat group	Type	MANUAL
Designer	alm12()	Creation Date	12/27/19
Execution Status	Passed	Subject	Chats

Description

1.60.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on chats	chats should be viewed
Step 3	tap on create a message icon	contact list should be viewed
Step 4	tap on new group	contact list should be viewed and multiple selecting should be enabled should be enabled
Step 5	select the chat group members from the list by tapping on	group members should be selected and viewed on the top of the screen
Step 6	tap on x to remove a contact from the group before creating	contact should be removed
Step 7	tap on next	New group page should be viewed
Step 8	type in the group subject	group subject should be typed
Step 9	tap on create	group should be created

1.61 Test ID : 63 - verify user can create a new contact

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can create a new contact	Type	MANUAL
Designer	alm12()	Creation Date	12/27/19
Execution Status	Passed	Subject	Chats

Description

1.61.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on chats	chats should be viewed
Step 3	tap on create a message icon	contact list should be viewed
Step 4	tap on new contact	new contact page should be viewed
Step 5	enter name, lastname, select country and phone number	contact details should be entered
Step 6	tap on more fields to enter company, email and address	company, email and address details should be enter
Step 7	tap on add another field to add another field for the contact details	field selected should be added

Step 8	tap on save	contact preview should be viewed
Step 9	tap on done	contact should be saved

1.62 Test ID : 65 - verify user can search a contact by scrolling down

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can search a contact by scrolling down	Type	MANUAL
Designer	alm12()	Creation Date	12/27/19
Execution Status	Passed	Subject	Chats

Description

1.62.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on chats	chats should be viewed
Step 3	tap on create a message icon	contact list should be viewed
Step 4	scroll down th screen to find the contact	scroll down feature should work

1.63 Test ID : 66 - verify user can narrow down the search for first letter of the contact by tapping on the letter in the vertical alphabet on the right side of the screen

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can narrow down the search for first letter of the contact by tapping on the letter in the vertical alphabet on the right side of the screen	Type	MANUAL
Designer	alm12()	Creation Date	12/27/19
Execution Status	Passed	Subject	Chats

Description

1.63.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open

Step 2	tap on chats	chats should be viewed
Step 3	tap on create a message icon	contact list should be viewed
Step 4	tap on the letter to narrow down the search	tapping on letter should bring up the contacts that starts with that letter

1.64 Test ID : 67 - verify user can cancel creating a message

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can cancel creating a message	Type	MANUAL
Designer	alm12()	Creation Date	12/27/19
Execution Status	Passed	Subject	Chats

Description

1.64.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on chats	chats should be viewed
Step 3	tap on create a message icon	contact list should be viewed
Step 4	tap on cancel	creating message should be cancelled

1.65 Test ID : 68 - verify user can send a photograph,document,location and contact to an individual or group

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can send a photograph,document,location and contact to an individual or group	Type	MANUAL
Designer	alm12()	Creation Date	12/27/19
Execution Status	Passed	Subject	Chats

Description

1.65.1 Design Steps

Step Name	Description	Expected Result
-----------	-------------	-----------------

Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on chats	chats should be viewed
Step 3	tap on create a message icon	contact list should be viewed
Step 4	select the individual or group for message to be sent	chat page with that individual or group should be viewed with the chat history
Step 5	tap on plus icon	attachment list should open (camera, photo&video library, document, location, contact)
Step 6	tap on camera	camera should open
Step 7	take a photo	photograph preview page should be viewed
Step 8	add a caption	caption should be typed
Step 9	tap on send button	photo should be sent and chat page should be viewed
Step 10	tap on plus icon	attachment list should open (camera, photo&video library, document, location, contact)
Step 11	tap on photo&video library	camera roll should open
Step 12	select a photo	photograph preview page should be viewed
Step 13	add a caption	caption should be typed
Step 14	tap on send button	photo should be sent and chat page should be viewed
Step 15	tap on plus icon	attachment list should open (camera, photo&video library, document, location, contact)
Step 16	tap on document	documents should open
Step 17	select a document	document preview page should be viewed
Step 18	tap on send button	document should be sent and chat page should be viewed
Step 19	tap on plus icon	attachment list should open (camera, photo&video library, document, location, contact)
Step 20	tap on location	send location page should open
Step 21	select a location (live location,current location or nearby location)	location should be sent
Step 22	tap on plus icon	attachment list should open (camera, photo&video library, document, location, contact)
Step 23	tap on contacts	share contacts page should open
Step 24	select contacts	contacts should be selected and added on top
Step 25	tap on done	share contact preview should be viewed

Step 26 tap on send contact should be sent

1.66 Test ID : 69 - verify user can send an audio

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can send an audio	Type	MANUAL
Designer	alm12()	Creation Date	12/27/19
Execution Status	Passed	Subject	Chats

Description

1.66.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on chats	chats should be viewed
Step 3	tap on create a message icon	contact list should be viewed
Step 4	select the individual or group for message to be sent	chat page with that individual or group should be viewed with the chat history
Step 5	tap and hold to microphone icon	recording should start
Step 6	release the microphone icon to send the audio	audio should be sent

1.67 Test ID : 70 - verify user can lock recording the audio instead of holding on the microphone button

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can lock recording the audio instead of holding on the microphone button	Type	MANUAL
Designer	alm12()	Creation Date	12/27/19
Execution Status	Passed	Subject	Chats

Description

1.67.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open

Step 2	tap on chats	chats should be viewed
Step 3	tap on create a message icon	contact list should be viewed
Step 4	select the individual or group for message to be sent	chat page with that individual or group should be viewed with the chat history
Step 5	tap and hold to microphone icon then slide up	recording should start and be locked cancel or send buttons should be enabled
Step 6	tap on send button	recording should be ended and sent

1.68 Test ID : 71 - verify user can cancel a recording while recording

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can cancel a recording while recording	Type	MANUAL
Designer	alm12()	Creation Date	12/27/19
Execution Status	Passed	Subject	Chats

Description

1.68.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on chats	chats should be viewed
Step 3	tap on create a message icon	contact list should be viewed
Step 4	select the individual or group for message to be sent	chat page with that individual or group should be viewed with the chat history
Step 5	tap and hold to microphone icon	recording should start
Step 6	slide the microphone icon to left	audio should be canceled

1.69 Test ID : 72 - verify user can make a call to an individual from the chat page then mute the call and end the call

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can make a call to an individual from the chat page then mute the call and end the call	Type	MANUAL

Execution Status	Passed	Subject	Chats
Description			

1.69.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on chats	chats should be viewed
Step 3	tap on create a message icon	contact list should be viewed
Step 4	select the individual or group	chat page with that individual or group should be viewed with the chat history
Step 5	tap on phone icon	call interface should open and call should be made
Step 6	tap on the mute button	call should be muted
Step 7	tap on end the call button	call should be ended and chat page should be viewed

1.70 Test ID : 73 - user can make a video call to an individual from the chat page and end the call

Field Label	Field Value	Field Label	Field Value
Test Name	user can make a video call to an individual from the chat page and end the call	Type	MANUAL
Designer	alm12()	Creation Date	12/27/19
Execution Status	Passed	Subject	Chats

Description

1.70.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on chats	chats should be viewed
Step 3	tap on create a message icon	contact list should be viewed
Step 4	select the individual or group	chat page with that individual or group should be viewed with the chat history
Step 5	tap on video call icon	video call interface should open and video call should be made

Step 6	tap on end the call icon	video call should be ended and chat page should be viewed
--------	--------------------------	---

1.71 Test ID : 74 - verify user can freeze the camera, switch between front and rear cameras and mute during a video call

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can freeze the camera, switch between front and rear cameras and mute during a video call	Type	MANUAL
Designer	alm12()	Creation Date	12/27/19
Execution Status	Passed	Subject	Chats

Description

1.71.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on chats	chats should be viewed
Step 3	tap on create a message icon	contact list should be viewed
Step 4	select the individual or group	chat page with that individual or group should be viewed with the chat history
Step 5	tap on video call icon	video call interface should open and video call should be made
Step 6	tap on freeze camera icon to freeze and unfreeze the camera	camera should be frozen and unfrozen
Step 7	tap on switch camera icon	camera should swicht to front or rear camera
Step 8	tap on mute icon	video call should be muted

1.72 Test ID : 75 - verify user can add multiple contacts to a video call only after first contact answers the call request

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can add multiple contacts to a video call only after first contact answers the call request	Type	MANUAL
Designer	alm12()	Creation Date	12/27/19
Execution Status	Passed	Subject	Chats

Description

1.72.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on chats	chats should be viewed
Step 3	tap on create a message icon	contact list should be viewed
Step 4	select the individual or group	chat page with that individual or group should be viewed with the chat history
Step 5	tap on video call icon	video call interface should open and video call should be made
Step 6	verify add contact button is disabled before the video call is answered	add contact button should be disabled
Step 7	verify add contact button is enabled after call answered	add contact button should be enabled

1.73 Test ID : 76 - verify user can view profile photo of the contact in chat page

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can view profile photo of the contact in chat page	Type	MANUAL
Designer	alm12()	Creation Date	12/27/19
Execution Status	Passed	Subject	Chats

Description

1.73.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on chats	chats should be viewed
Step 3	tap on create a message icon	contact list should be viewed
Step 4	select the individual or group	chat page with that individual or group should be viewed with the chat history
Step 5	tap on the photo	photograph should be viewed

1.74 Test ID : 77 - verify user can view the contact info details from the chat screen

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can view the contact info details from the chat screen	Type	MANUAL
Designer	alm12()	Creation Date	12/27/19
Execution Status	Passed	Subject	Chats

Description

1.74.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on chats	chats should be viewed
Step 3	tap on create a message icon	contact list should be viewed
Step 4	select the individual or group	chat page with that individual or group should be viewed with the chat history
Step 5	tap on the contact name	contact info details should be viewed

1.75 Test ID : 78 - verify user can call, message or video call in contact info page

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can call, message or video call in contact info page	Type	MANUAL

Description

1.80.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on chats	chats should be viewed
Step 3	tap on create a message icon	contact list should be viewed
Step 4	select the individual or group	chat page with that individual or group should be viewed with the chat history
Step 5	tap on the contact name	contact info details should be viewed

Step 6	tap on starred messages	starred messages should be viewed
Step 7	tap on the arrow next to the starred message	starred message should be viewed in the chat history
Step 8	tap on edit	selecting should be enabled
Step 9	select the starred messages to be deleted	starred messages should be selected
Step 10	tap on delete icon	deleteing should be completed
Step 11	tap on edit	selecting should be enabled
Step 12	select the starred messages to be unstarred	starred messages should be selected
Step 13	tap on star icon	unstarring should be completed
Step 14	tap on edit	selecting should be enabled
Step 15	select the starred messages to be forwarded	starred messages should be selected
Step 16	tap on forward icon	contact list and my status should be viewed with a serach bar
Step 17	select the contacts to forward	contacts should be selected
Step 18	tap on forward	forwardin should be completed
Step 19	tap on edit	selecting should be enabled
Step 20	select the starred messages to be shared	starred messages should be selected
Step 21	tap on share icon	share page should be viewed
Step 22	select the share method	share method should be selected
Step 23	complete the sharing	sharing should be completed

1.81 Test ID : 84 - verify user can unstar, forward, copy or delete by tapping and holding onto the starred message

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can unstar, forward, copy or delete by tapping and holding onto the starred message	Type	MANUAL
Designer	alm12()	Creation Date	12/28/19
Execution Status	Passed	Subject	Chats

Description

1.81.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on chats	chats should be viewed
Step 3	tap on create a message icon	contact list should be viewed
Step 4	select the individual or group	chat page with that individual or group should be viewed with the chat history
Step 5	tap on the contact name	contact info details should be viewed
Step 6	tap on starred messages	starred messages should be viewed
Step 7	tap and hold to the starred message	unstar, forward, copy, delete ption window shoul appear
Step 8	tap on unstar to unstar, forward to forward, copy to copy and delete do delete	unstarring,forwarding, copying and deleting should be completed

1.82 Test ID : 85 - verify user can search a chat inside the chat history with the individual contact or group

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can search a chat inside the chat history with the individual contact or group	Type	MANUAL
Designer	alm12()	Creation Date	12/28/19
Execution Status	Passed	Subject	Chats

Description

1.82.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on chats	chats should be viewed
Step 3	tap on create a message icon	contact list should be viewed
Step 4	select the individual or group	chat page with that individual or group should be viewed with the chat history
Step 5	tap on the contact name	contact info details should be viewed
Step 6	tap on chat search	chat search page should be viewed witha search bar
Step 7	type in the search bar to search	matching search words should be brought up from the chat history

1.83 Test ID : 86 - verify user can mute and unmute a contact

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can mute and unmute a contact	Type	MANUAL
Designer	alm12()	Creation Date	12/28/19
Execution Status	Passed	Subject	Chats

Description

1.83.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on chats	chats should be viewed
Step 3	tap on create a message icon	contact list should be viewed
Step 4	select the individual or group	chat page with that individual or group should be viewed with the chat history
Step 5	tap on the contact name	contact info details should be viewed
Step 6	tap on mute	options should be viewed as 8 hours, 1 week, 1 year
Step 7	tap on the preferred mute period	muting should be completed and mute should be replaced with muted in the contact details page
Step 8	tap on muted	unmute button should appear
Step 9	tap on unmute button	unmuting should be completed

1.84 Test ID : 87 - verify user can set a custom tone in contact info page

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can set a custom tone in contact info page	Type	MANUAL
Designer	alm12()	Creation Date	12/28/19
Execution Status	Passed	Subject	Chats

Description

1.84.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on chats	chats should be viewed
Step 3	tap on create a message icon	contact list should be viewed
Step 4	select the individual or group	chat page with that individual or group should be viewed with the chat history
Step 5	tap on the contact name	contact info details should be viewed
Step 6	tap on custom tone	sound list should appear
Step 7	select the custom tone	custom tone should be selected
Step 8	tap on save	custom tone should be saved

1.85 Test ID : 88 - verify user can set save to camera roll settings

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can set save to camera roll settings	Type	MANUAL
Designer	alm12()	Creation Date	12/28/19
Execution Status	Passed	Subject	Chats

Description

1.85.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on chats	chats should be viewed
Step 3	tap on create a message icon	contact list should be viewed
Step 4	select the individual or group	chat page with that individual or group should be viewed with the chat history
Step 5	tap on the contact name	contact info details should be viewed
Step 6	tap on save to camera roll	save to camera roll settings should appear (default-on, always, never)
Step 7	select the save to camera roll setting	save to camera roll setting should be set

1.86 Test ID : 89 - verify user can view, scan or share the encryption QR code

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can view, scan or share the encryption QR code	Type	MANUAL
Designer	alm12()	Creation Date	12/28/19
Execution Status	Passed	Subject	Chats

Description

1.86.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on chats	chats should be viewed
Step 3	tap on create a message icon	contact list should be viewed
Step 4	select the individual or group	chat page with that individual or group should be viewed with the chat history
Step 5	tap on the contact name	contact info details should be viewed
Step 6	tap on encryption	(verify security code between user and contact) page should be viewed
Step 7	scan the QR code from the contacts device to encrypt the messages and call between user and contact	encryption should be done
Step 8	tap on scan code	camera should open to scan the QR code from contacts device
Step 9	scan the QR code from contacts device	encryption should be done
Step 10	tap on share button	share page should be viewed
Step 11	select the share method	the share method should be selected
Step 12	complete the sharing	sharing should be completed

1.87 Test ID : 90 - verify user can learn more about encryption

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can learn more about encryption	Type	MANUAL
Designer	alm12()	Creation Date	12/28/19
Execution Status	Passed	Subject	Chats

Description

1.87.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on chats	chats should be viewed
Step 3	tap on create a message icon	contact list should be viewed
Step 4	select the individual or group	chat page with that individual or group should be viewed with the chat history
Step 5	tap on the contact name	contact info details should be viewed
Step 6	tap on encryption	(verify security code between user and contact) page should be viewed
Step 8	tap on learn more	whatsapp FAQ page for end-to-end encryption should be viewed

1.88 Test ID : 91 - verify user can view the groups in common

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can view the groups in common	Type	MANUAL
Designer	alm12()	Creation Date	12/28/19
Execution Status	Passed	Subject	Chats

Description

1.88.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on chats	chats should be viewed
Step 3	tap on create a message icon	contact list should be viewed
Step 4	select the individual or group	chat page with that individual or group should be viewed with the chat history
Step 5	tap on the contact name	contact info details should be viewed
Step 6	tap on groups in common	groups in common list should be viewed
Step 7	tap on the group for chat details	group chat details should be viewed

1.89 Test ID : 92 - verify user can archive and unarchive the group chats

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can archive and unarchive the group chats	Type	MANUAL
Designer	alm12()	Creation Date	12/28/19
Execution Status	Passed	Subject	Chats

Description

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on chats	chats should be viewed
Step 3	tap on create a message icon	contact list should be viewed
Step 4	select the individual or group	chat page with that individual or group should be viewed with the chat history
Step 5	tap on the contact name	contact info details should be viewed
Step 6	tap on groups in common	groups in common list should be viewed
Step 7	slide left the group chat from the list	more and archive buttons should appear
Step 8	tap on archive	group chat should be archived
Step 7	slide left the group chat from the list	more and unarchive buttons should appear
Step 8	tap on unarchive	group chat should be unarchived

1.90 Test ID : 93 - verify user can mute the group, view the group info, export chat, clear chat and exit group by tapping on (more) from groups in common page

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can mute the group, view the group info, export chat, clear chat and exit group by tapping on (more) from groups in common page	Type	MANUAL
Designer	alm12()	Creation Date	12/28/19
Execution Status	Passed	Subject	Chats

Description

1.90.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on chats	chats should be viewed
Step 3	tap on create a message icon	contact list should be viewed
Step 4	select the individual or group	chat page with that individual or group should be viewed with the chat history
Step 5	tap on the contact name	contact info details should be viewed
Step 6	tap on groups in common	groups in common list should be viewed
Step 7	slide left the group chat from the list	more and archive buttons should appear
Step 8	tap on more	mute, group info, export chat, clear chat and exit group buttons should appear
Step 9	tap on mute	Mute time periods should appear as 8 hours, 1 week, 1 year
Step 10	select mute period	group should be muted for selected time period
Step 11	slide left the group chat from the list	more and archive buttons should appear
Step 12	tap on more	mute, group info, export chat, clear chat and exit group buttons should appear
Step 13	tap on unmute	group should be unmuted
Step 14	slide left the group chat from the list	more and archive buttons should appear
Step 15	tap on more	mute, group info, export chat, clear chat and exit group buttons should appear
Step 16	tap on group info	group info page should be viewed
Step 17	slide left the group chat from the list	more and archive buttons should appear
Step 18	tap on more	mute, group info, export chat, clear chat and exit group buttons should appear
Step 19	tap on export chat	chat should be exported and share page should open with exported chat file
Step 20	slide left the group chat from the list	more and archive buttons should appear
Step 21	tap on more	mute, group info, export chat, clear chat and exit group buttons should appear
Step 22	tap on clear chat	delete all messages confirmation should appear
Step 23	tap on delete all messages	all messages in the chat history should be cleared
Step 24	slide left the group chat from the list	more and archive buttons should appear

Step 25	tap on more	mute, group info, export chat, clear chat and exit group buttons should appear
Step 26	tap on exit group	exit group and mute instead buttons should appear
Step 27	tap on exit group	user should leave the group

1.91 Test ID : 94 - verify user can view, edit and delete contact details from contact info page

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can view, edit and delete contact details from contact info page	Type	MANUAL
Designer	alm12()	Creation Date	12/28/19
Execution Status	Passed	Subject	Chats

Description

1.91.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on chats	chats should be viewed
Step 3	tap on create a message icon	contact list should be viewed
Step 4	select the individual or group	chat page with that individual or group should be viewed with the chat history
Step 5	tap on the contact name	contact info details should be viewed
Step 6	tap on contact details	contact details should be viewed
Step 7	tap on edit	editing should be enabled
Step 8	enter the new contact details	new contact details should be entered
Step 9	tap on save	edited contact details should be saved
Step 10	tap on edit	editing should be enabled
Step 11	tap on delete contact	delete contact confirmation button should appear
Step 12	tap on delete contact confirmation button	contact should be deleted, chat history should stay

1.92 Test ID : 95 - verify user can export the chat from contact info page

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can export the chat from contact info page	Type	MANUAL
Designer	alm12()	Creation Date	12/28/19
Execution Status	Passed	Subject	Chats

Description

1.92.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on chats	chats should be viewed
Step 3	tap on create a message icon	contact list should be viewed
Step 4	select the individual or group	chat page with that individual or group should be viewed with the chat history
Step 5	tap on the contact name	contact info details should be viewed
Step 6	tap on export chat	chat should be exported and share page should open with exported chat file

1.93 Test ID : 96 - verify user can clear chat from contact info page

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can clear chat from contact info page	Type	MANUAL
Designer	alm12()	Creation Date	12/28/19
Execution Status	Passed	Subject	Chats

Description

1.93.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on chats	chats should be viewed
Step 3	tap on create a message icon	contact list should be viewed
Step 4	select the individual or group	chat page with that individual or group should be viewed with the

		chat history
Step 5	tap on the contact name	contact info details should be viewed
Step 6	tap on clear chat	delete all messages button should appear
Step 7	tap on delete all messages	all messages should be deleted in the chat history

1.94 Test ID : 97 - verify user can block, report and block and unblock contact from contact info page

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can block, report and block and unblock contact from contact info page	Type	MANUAL
Designer	alm12()	Creation Date	12/28/19
Execution Status	Passed	Subject	Chats

Description

1.94.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on chats	chats should be viewed
Step 3	tap on create a message icon	contact list should be viewed
Step 4	select the individual or group	chat page with that individual or group should be viewed with the chat history
Step 5	tap on the contact name	contact info details should be viewed
Step 6	tap on block contact	(block) and (report and block) buttons should appear
Step 7	tap on block	contact should be blocked
Step 8	tap on unblock contact	contact should be unblocked
Step 9	tap on block contact	(block) and (report and block) buttons should appear
Step 10	tap on report and block	report and block button should appear
Step 11	tap on report and block	report sent and contact has been blocked notice should appear
Step 12	tap on ok	report sent and contact has been blocked notice should disappear

Description

1.98.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on chats	chats should be viewed
Step 3	tap on new group	add participants page should be viewed and contact list should be available for selecting
Step 4	select contacts to be in the group	contacts should be selected and listed on the top
Step 5	tap on next	group subject page should be viewed
Step 6	enter group subject	group subject should be entered
Step 7	tap on create	group should be created

1.99 Test ID : 102 - verify user can view, delete and create new broadcast lists

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can view, delete and create new broadcast lists	Type	MANUAL
Designer	alm12()	Creation Date	12/28/19
Execution Status	Passed	Subject	Chats

Description

1.99.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on chats	chats should be viewed
Step 3	tap on broadcast lists	broadcast lists should be viewed
Step 4	tap on new list	recipients page should open and contact list should be available to select
Step 5	select contacts to be in the broadcast list	contacts should be selected
Step 6	tap on create	broadcast list should be created
Step 7	tap on edit	editing should be enabled

Step 8	tap on minus symbol in red circle	delete button should appear
Step 9	tap on delete	broadcast list should be deleted

1.100 Test ID : 103 - verify user can view the message info as delivered, read, seen, played

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can view the message info as delivered, read, seen, played	Type	MANUAL
Designer	alm12()	Creation Date	12/28/19
Execution Status	Passed	Subject	Chats

Description

1.100.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on chats	chats should be viewed
Step 3	select the individual or group	chat page with that individual or group should be viewed with the chat history
Step 4	swipe left individual message, media, audio, link, document, location or contact that was sent by the user	message info should be viewed with date time and status (read, seen, played, delivered)

1.101 Test ID : 104 - verify user can resend a message, media, audio, link, document, location or contact

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can resend a message, media, audio, link, document, location or contact	Type	MANUAL
Designer	alm12()	Creation Date	12/28/19
Execution Status	Passed	Subject	Chats

Description

1.101.1 Design Steps

Step Name	Description	Expected Result
-----------	-------------	-----------------

Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on chats	chats should be viewed
Step 3	select the individual or group	chat page with that individual or group should be viewed with the chat history
Step 4	swipe right an individual message, media, audio, link, document, location or contact	message, media, audio, link, document, location or contact should be recreated and message box should be active
Step 5	add a message or audio, photo, media, location, document, contact	send button should be enabled
Step 6	tap on send button	selected message should be resent with added message or attachment

1.102 Test ID : 105 - verify user can view all the individual and group chats as a list in the chats module

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can view all the individual and group chats as a list in the chats module	Type	MANUAL
Designer	alm12()	Creation Date	12/28/19
Execution Status	Passed	Subject	Chats

Description

1.102.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on chats	chats should be viewed

1.103 Test ID : 106 - verify user can view all the chat history with an individual or group

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can view all the chat history with an individual or group	Type	MANUAL
Designer	alm12()	Creation Date	12/28/19
Execution Status	Passed	Subject	Chats

Description

1.103.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on chats	chats should be viewed
Step 3	tap on a chat from the chat list	chat history should be viewed

1.104 Test ID : 107 - verify user can star, unstar ,reply-to, forward, copy and delete a single message

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can star, unstar ,reply-to, forward, copy and delete a single message	Type	MANUAL
Designer	alm12()	Creation Date	12/28/19
Execution Status	Passed	Subject	Chats

Description

star, unstar ,reply-to, forward, copy and delete can be done by double tapping or holding onto the message

1.104.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on chats	chats should be viewed
Step 3	tap on a chat from the chat list	chat history should be viewed
Step 4	tap and hold onto a message	star, reply, forward, copy and delete buttons should appear
Step 5	tap on star	message should be starred
Step 6	tap and hold onto same message	star, reply, forward, copy and delete buttons should appear
Step 7	tap on unstar	message should be unstarred
Step 8	tap and hold onto a message	star, reply, forward, copy and delete buttons should appear
Step 9	tap on reply	selected message should be viewed on the top of hte text box, and typing should be enabled
Step 10	enter a message or any attachment to the message	send button should be enabled
Step 11	tap on send	message should be resend with new message or attachment
Step 12	tap and hold onto a message	star, reply, forward, copy and delete buttons should appear
Step 13	tap on forward	selecting messages should be enabled. Forward and share button

		should be viewed
Step 14	select messages	messages should be selected
Step 15	tap on forward icon	contact list should be viewed and contacts and my status should be enabled to select
Step 16	select contacts to forward	forward button should be enabled
Step 17	tap on forward	message should be forwarded
Step 18	tap and hold onto a message	star, reply, forward, copy and delete buttons should appear
Step 19	tap on copy	message should be copied
Step 20	tap and hold onto a message	star, reply, forward, copy and delete buttons should appear
Step 21	tap on delete	selecting messages should be enabled. delete icon should be viewed
Step 22	tap on delete icon	message should be deleted

1.105 Test ID : 108 - verify user can turn on the camera

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can turn on the camera	Type	MANUAL
Designer	alm12()	Creation Date	12/28/19
Execution Status	Passed	Subject	Camera

Description

1.105.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on camera	camera should be turned on

1.106 Test ID : 109 - verify user can swith between front and rear cameras

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can swith between front and rear cameras	Type	MANUAL
Designer	alm12()	Creation Date	12/28/19
Execution Status	Passed	Subject	Camera

Description

1.106.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on camera	camera should be turned on
Step 3	tap on switch camera icon	camera should be switched

1.107 Test ID : 110 - verify user can select a picture on the camera screen by sliding left from recent pictures in camera roll

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can select a picture on the camera screen by sliding left from recent pictures in camera roll	Type	MANUAL
Designer	alm12()	Creation Date	12/28/19
Execution Status	Passed	Subject	Camera

Description

1.107.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on camera	camera should be turned on
Step 3	slide the pictures on the screen to left	pictures should be viewed on the camera screen
Step 4	select the picture by tapping on it	picture should be selected and add a caption box, rotate icon, add emoji icon, type icon and draw icon should be enabled

1.108 Test ID : 111 - verify user can select a picture by opening the camera roll of the device

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can select a picture by opening the camera roll of the device	Type	MANUAL
Designer	alm12()	Creation Date	12/28/19
Execution Status	Passed	Subject	Camera

Description

1.108.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on camera	camera should be turned on
Step 3	tap on the picture icon	camera roll should be opened
Step 4	tap on the picture	picture should be selected

1.109 Test ID : 112 - verify user can night mode of the camera on and off

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can night mode of the camera on and off	Type	MANUAL
Designer	alm12()	Creation Date	12/28/19
Execution Status	Passed	Subject	Camera

Description

1.109.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on camera	camera should be turned on
Step 3	tap on the moon icon	night mode should be turned on
Step 4	tap on the moon icon	night mode should be turned off

1.110 Test ID : 113 - verify user can change flash settings as on, off and automatic

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can change flash settings as on, off and automatic	Type	MANUAL
Designer	alm12()	Creation Date	12/28/19
Execution Status	Passed	Subject	Camera

Description

1.110.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on camera	camera should be turned on
Step 3	tap on the flash icon	flash should be turned on and yellow flash icon should be viewed
Step 4	tap on the flash icon	flash should be turned off and flash icon with slash should be viewed
Step 3	tap on the flash icon	flash should be turned on as automatic and yellow flash icon with letter a should be viewed

1.111 Test ID : 114 - verify user can take a photo

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can take a photo	Type	MANUAL
Designer	alm12()	Creation Date	12/28/19
Execution Status	Passed	Subject	Camera

Description

1.111.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on camera	camera should be turned on
Step 3	tap on take a photo button	photo should be taken

1.112 Test ID : 115 - verify user can record a video

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can record a video	Type	MANUAL
Designer	alm12()	Creation Date	12/28/19
Execution Status	Passed	Subject	Camera

Description

1.112.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on camera	camera should be turned on
Step 3	tap and hold onto take a photo button	video should start recording
Step 4	release the button	recording should be finished

1.113 Test ID : 116 - verify user can edit a photo

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can edit a photo	Type	MANUAL
Designer	alm12()	Creation Date	12/28/19
Execution Status	Passed	Subject	Camera

Description

1.113.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on camera	camera should be turned on
Step 3	tap on take a photo button	photo should be taken
Step 4	tap on rotate icon	rotate page should open
Step 5	verify rotating can be done as wished and tap on done	rotating should be done to the picture
Step 6	tap on emoji icon	stickers and emojis should be viewed
Step 7	tap on an emoji or sticker	emoji or sticker should be located on the picture
Step 8	tap and hold on to emoji or sticker and drag to a wished location	emoji or sticker should be relocated
Step 9	tap on the screen where emoji or sticker is with two fingers, move them inside or outside to adjust the size for bigger or smaller	emoji or sticker size should be adjusted
Step 10	tap on T icon	writing should be enabled , keyboard and color adjusting bar should be viewed
Step 11	type the text and adjust the color from the bar	typing should be done and color should be adjusted
Step 12	tap on the screen anywhere	text should be located on the screen

Step 13	tap and hold on to text and drag to a wished location	text should be relocated
Step 14	tap on the screen where text is with two fingers, move them inside or outside to adjust the size for bigger or smaller	text size should be adjusted
Step 15	tap on hold onto emoji, sticker or text	dragging should be enabled and trash can could be viewed
Step 16	drag the emoji, sticker or text to trash can and release it	emoji, sticker or text should be deleted from the photo
Step 17	tap on the pen icon	color adjusting bar should be viewed and drawing should be enabled
Step 18	adjust the color by tapping on the desired color from the bar	color should be selected
Step 19	tap on the screen and move around the screen to draw	drawing should be done
Step 20	tap on undo icon	last drawing should be deleted
Step 21	tap on the pen icon	drawing should be completed and located on the picture

1.114 Test ID : 117 - verify user can send a photo with caption

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can send a photo with caption	Type	MANUAL
Designer	alm12()	Creation Date	12/29/19
Execution Status	Passed	Subject	Camera

Description

1.114.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on camera	camera should be turned on
Step 3	tap on take a photo button	photo should be taken
Step 4	tap on text box	keyboard should be viewed
Step 5	enter the caption	text should be entered
Step 6	tap on send button	photo should be sent with the caption

1.115 Test ID : 118 - verify user can send a video with caption

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can send a video with caption	Type	MANUAL
Designer	alm12()	Creation Date	12/29/19
Execution Status	Passed	Subject	Camera

Description

1.115.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on camera	camera should be turned on
Step 3	tap on take a photo button and hold onto it	recording should be started
Step 4	release the button	recording should be completed
Step 5	tap on text box	keyboard should be viewed
Step 6	enter the caption	text should be entered
Step 7	tap on send button	video should be sent with the caption

1.116 Test ID : 119 - verify user can turn off the camera

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can turn off the camera	Type	MANUAL
Designer	alm12()	Creation Date	12/29/19
Execution Status	Passed	Subject	Camera

Description

1.116.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on camera	camera should be turned on
Step 3	tap on x icon on the left top corner	camera should be turned off

1.117 Test ID : 120 - verify user can view the calls

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can view the calls	Type	MANUAL
Designer	alm12()	Creation Date	12/29/19
Execution Status	Passed	Subject	Calls

Description

1.117.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on calls button	calls page should be viewed

1.118 Test ID : 121 - verify user view the all calls when calls page opened

Field Label	Field Value	Field Label	Field Value
Test Name	verify user view the all calls when calls page opened	Type	MANUAL
Designer	alm12()	Creation Date	12/29/19
Execution Status	Passed	Subject	Calls

Description

1.118.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on calls button	all calls should be viewed

1.119 Test ID : 122 - verify user can view the missed calls

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can view the missed calls	Type	MANUAL
Designer	alm12()	Creation Date	12/29/19
Execution Status	Passed	Subject	Calls

Description

1.119.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on calls button	calls page should be viewed
Step 3	tap on missed button	missed calls should be viewed

1.120 Test ID : 123 - verify user can search from all calls and cancel the search

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can search from all calls and cancel the search	Type	MANUAL
Designer	alm12()	Creation Date	12/29/19
Execution Status	Passed	Subject	Calls

Description

1.120.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on calls button	calls page should be viewed
Step 3	tap on search box	keyboard should be viewed
Step 4	enter contact name to be searched	contact name should be entered and matching call histories should be listed
Step 5	tap on cancel or x in search box	search should be canceled

1.121 Test ID : 124 - verify user can search from the missed calls and cancel the search

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can search from the missed calls and cancel the search	Type	MANUAL
Designer	alm12()	Creation Date	12/29/19
Execution Status	Passed	Subject	Calls

Description

1.121.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on calls button	calls page should be viewed
Step 3	tap on missed button	missed calls should be viewed
Step 4	tap on search box	keyboard should be viewed
Step 5	enter contact name to be searched	contact name should be entered and matching call histories should be listed
Step 6	tap on cancel or x in search box	search should be canceled

1.122 Test ID : 125 - verify user can redo the call to an individual

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can redo the call to an individual	Type	MANUAL
Designer	alm12()	Creation Date	12/29/19
Execution Status	Passed	Subject	Calls

Description

1.122.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on calls button	all calls should be viewed
Step 3	tap on the contact name from the list	call to that individual should be made

1.123 Test ID : 126 - verify user can view the contact info from calls page

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can view the contact info from calls page	Type	MANUAL
Designer	alm12()	Creation Date	12/29/19
Execution Status	Passed	Subject	Calls

Description

1.123.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on calls button	all calls should be viewed
Step 3	tap on information icon next to the contact name from the list	contact info should be viewed

1.124 Test ID : 127 - verify user can start a new call

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can start a new call	Type	MANUAL
Designer	alm12()	Creation Date	12/29/19
Execution Status	Passed	Subject	Calls

Description

1.124.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on calls button	all calls should be viewed
Step 3	tap on new call icon	new call page should be viewed and contact list should be viewed and enabled to select
Step 4	tap on the contact name or phone icon	call should be started

1.125 Test ID : 128 - verify user can start a new video call

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can start a new video call	Type	MANUAL
Designer	alm12()	Creation Date	12/29/19
Execution Status	Passed	Subject	Calls

Description

1.125.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open

Step 2	tap on calls button	all calls should be viewed
Step 3	tap on new call icon	new call page should be viewed and contact list should be viewed and enabled to select
Step 4	tap on video call icon next to the contact name	video call should be started

1.126 Test ID : 129 - verify user can delete the calls individually

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can delete the calls individually	Type	MANUAL
Designer	alm12()	Creation Date	12/29/19
Execution Status	Passed	Subject	Calls

Description

1.126.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on calls button	all calls should be viewed
Step 3	tap on edit	deleting calls should be enabled
Step 4	tap on the minus icon in red circle for a call that wished to be deleted	delete button should be viewed
Step 5	tap on delete button	call should be deleted from the list

1.127 Test ID : 130 - verify user can clear all the calls in the list

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can clear all the calls in the list	Type	MANUAL
Designer	alm12()	Creation Date	12/29/19
Execution Status	Passed	Subject	Calls

Description

1.127.1 Design Steps

Step Name	Description	Expected Result
-----------	-------------	-----------------

Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on calls button	all calls should be viewed
Step 3	tap on edit	deleting calls should be enabled
Step 4	tap on clear	clear call history confirmation button should be viewed
Step 5	tap on clear call history	all call history should be cleared

1.128 Test ID : 131 - verify user can start a new group call

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can start a new group call	Type	MANUAL
Designer	alm12()	Creation Date	12/29/19
Execution Status	Passed	Subject	Calls

Description

1.128.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on calls button	all calls should be viewed
Step 3	tap on new call icon	new call page should be viewed and contact list should be viewed and enabled to select
Step 4	tap on new group call	contact list should open and contacts should be enabled to be selected
Step 5	select the contacts wished to be in the group call	contacts, voice call and video call buttons should be viewed at the top
Step 6	tap on voice or video call button	call should be started

1.129 Test ID : 132 - verify user can view status page

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can view status page	Type	MANUAL
Designer	alm12()	Creation Date	12/29/19
Execution Status	Passed	Subject	Status

Description

1.129.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on status	status page should be viewed

1.130 Test ID : 133 - verify user can view the status that are posted by contacts

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can view the status that are posted by contacts	Type	MANUAL
Designer	alm12()	Creation Date	12/29/19
Execution Status	Passed	Subject	Status

Description

1.130.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on status	status page should be viewed and status list should be viewed
Step 3	tap on the contact name from the list	status that are posted should be watched

1.131 Test ID : 134 - verify user can post a status

Field Label	Field Value	Field Label	Field Value
Test Name	verify user can post a status	Type	MANUAL
Designer	alm12()	Creation Date	12/29/19
Execution Status	Passed	Subject	Status

Description

1.131.1 Design Steps

Step Name	Description	Expected Result
Step 1	Launch whatsapp application from the IOS device	chat page should open
Step 2	tap on status	status page should be viewed and status list should be viewed
Step 3	tap on My status or camera icon next to it	camera page should open
Step 4	select the post	post should be selected

Step 5

tap on send button

status should be posted
